NEW SENATE OFFICIAL NATIVE OF MISSOURI

John T. Wayland, Assistant
Sergeant-at-Arms, Spent
Early Life on Farm.

John T. Wayland of Kansas City, Mo., the recently appointed assistant sergeant-at-arms of the Senate, has taken hold of his new work in Washington with the energy which has characterized his previous career as a business man and as a lawyer.

Much of the work of the office of the sergeant-at-arms of the Senate necessarily must be left to the assistant sergeant-at-arms, and in case of the absence of the sergeant-at-arms, the whole of the duties of this office devolve upon him.

Early Life on Farm.
Mr. Wayland was born near Armstrong, Mo., in 1878. He lived on a farm with his father for the greater part of his first twenty-one years. He attended Central College at Fayette, where Senator Shafroth, now senator from Colorado, is also a graduate.

Twelve years ago Mr. Wayland moved to Kansas City and went into the grain commission business. He was a member of the board of trade of that city and made good progress in the business world. He turned, however, to the study of law in 1907 and read law in the office

JOHN T. WAYLAND.

of James A. Reed, now a senator from Missouri, and was admitted to the bar by the Missouri supreme court commission, and afterward completed a course in the Kansas City School of Law, began active practice in 1910 and made quick success.

Active in Politics.
Mr. Wayland has taken an active part in politics during recent years, and he was in charge of the campaign waged by W. S. Cowherd for Governor of Missouri last year. His candidate was defeated by less than 2,500 votes.

Mayor Jost of Kansas City, recently offered Mr. Wayland the secretaryship of the civil service commission of Kansas City, but he declined it. He is a member of the democratic committee of Kansas City, and also a member of the executive committee of the Kansas City Bar Association, the largest bar association west of New York city. He is married and has two children.

Rev. P. B. Stouffer, former rector of St. John's Episcopal Church at Harpers Ferry, W. Va., and lately of Kensington, Md., has accepted a call to Shrewsbury parish, Kent county, Md.

Stomax

The Successful European

Digestion Tonic

Prepared by Saiz de Carlos, a
Physician, Surgeon and Pharma-
ceutist of acknowledged standing
in Europe.

Stomax, already favorably known
to, and recommended by, the medical
profession, is introduced to the public
as the best and safest treatment for

Diseases of the Stomach
and Intestines.

relieving pain, aiding digestion, stim-
ulating appetite and toning the entire
system.

No alteration in the patient's usual
diet need be made, except in extreme
cases.

Stomax is gradual and benign in its re-
sults, restoring the patient to robust health.
It is invaluable to brain workers; it increases
the capacity for effort, corrects ailments of
children, and benefits both young and old.

For sale by all druggists.

BOY SCOUTS C. THROCKMORTON AND J. STOCKARD OF TROOP NO. 7, WHO
RECENTLY HIKE 150 MILES THROUGH VIRGINIA, SLEEPING IN THE
OPEN.

Arrangements have been completed for the presentation of medals to the Boy Scouts who were on duty along the line of march of the suffragist parade March 2. The medals are to be presented at the Cosmos Theater next Saturday morning, following the exhibition of motion pictures showing first-aid work by the American Red Cross Society.

The presentation speech will be made by Mrs. William Kent, wife of Representative Kent, on behalf of the suffragist organization. Colin H. Livingston, president of the Boy Scouts of America, will accept the medals on behalf of the Boy Scout organization.

The actual presentation of the medals to each scout who was on duty March 3 will then be made by members of the committee which had charge of the raising of the funds with which they were purchased. Mrs. Bessie Cockrell, who was the first to suggest that the Boy Scouts be rewarded for their services during the parade, is a member of this committee.

About 250 medals were presented to local scouts. Those to be presented to the out-of-town scouts who were in Washington the day of the parade will be taken care of by President Livingston, who will see that they are distributed throughout the country to the scouts who are entitled to them.

What is said to have been the largest and most enthusiastic Boy Scout meeting Washington has ever witnessed was held Wednesday afternoon in the Jefferson School. Five hundred boys of the eighth division of public schools gathered in the assembly hall to hear addresses on the work of the Boy Scouts of America, and to see demonstrations of scout activities.

The success of the meeting was largely due to the efforts of Miss Anne Beers, supervising principal of the eighth division, who is a strong believer in the scout movement. The boys gathered in the assembly hall of the school at 1 o'clock in the afternoon and the remainder of the school day was devoted to the meeting.

Assistant Scout Commissioner Frank C. Wood told of the work of the local scout organization and explained the purposes of the Boy Scout movement. Albert M. Chesley, of the boys' department of the Y. M. C. A., spoke of the work of the Young Men's Christian Association Boy Scout Troop. Addresses also were made by J. I. Congrove, financial secretary of the local scout council, and C. N. Perkins, scoutmaster of Troop No. 43.

Fred Reed of Troop No. 17, who is the champion freighter of America, demonstrated the art of making fire without matches. The school day was devoted to the meeting.

Scout Commissioner E. S. Martin left for Columbia, Monday morning, to assist Ernest Ricknell, field director of the American Red Cross Society, in the organization of Boy Scouts and Christian boys in the flooded districts into sanitary squads. Mr. Martin formerly lived in Columbus and familiar with the flooded Ohio cities. The sanitary squads have been organized for the purpose of reporting to the health authorities any insanitary conditions which are discovered.

Troop No. 44, under the direction of Scoutmaster E. E. Jones, demonstrated Boy Scout activities before the members of the Bethesda Citizens' Association Monday night.

The following memorandum has been forwarded to all the scoutmasters of the local council:

The Boy Scouts of the District have been called on by the clean city committee to assist in the work of clean-up week. The following plan has been adopted and scoutmasters are requested to instruct their scouts accordingly:

At all sold into the grounds surrounding his own home are properly cleaned and the refuse disposed of according to the regulations of the health department.

To report to the clean city committee any premises in the vicinity of his home which are not clean.

Troops may be detailed to distribute cards asking people in various sections of the city to clean up their premises. Details will be announced later.

Scoutmasters are requested to secure cards from local health officers for each scout in his troop the first of this week. These cards should be returned to headquarters following the meeting. Scouts "cleaned up" and have returned the cards to the scoutmasters.

Troop No. 10, T. R. Pirle, scoutmaster, demonstrated Boy Scout activities before the Sunday School of the Bethesda Christian Church Friday night. It is expected that a troop will be organized among the boys of this Sunday school in the near future.

Tenderfoot investiture ceremonies were conducted Friday night at the Methodist Church in Anacostia under the direction of Assistant Scout Commissioner Frank C. Wood. The meeting was attended by the parents of the members of the newly organized troop. William B. Marshall of the National Museum has been selected as scoutmaster for this troop.

Mr. Wood went to Anacostia early in the evening in order to ascertain if the site of Fort Stanton is suited as a rendezvous for the scouts in that neighborhood.

No examinations for merit badges were given during the past week, because of the absence from the city of Scout Commissioner Martin.

Troop No. 40, at Kentworth, is still on

the lookout for a base ball game with some other Boy Scout troop. A game will be arranged by communicating with W. Prentice of 1511 Olive street north-east.

FORCED TO CARRY HER FROM BURNING HOME

Mrs. Stewart of Culpeper, Va., Be-
comes Panic-Stricken When
House Catches Fire.

Special Correspondence of The Star.

CULPEPER, Va., April 12, 1913.
While the family of Charles Williams was attending services at St. Stephen's Church here Sunday night, a fire broke out in the house, and Mrs. Williams was forced to carry her from the burning building.

The senior class of the Culpeper High School gave an entertainment in the new armory hall Thursday night. Assisting them in the musical program were Rev. Thomas Hooper and Miss Bessie Hooper, Miss Mary Nalle and Mrs. Wise Jennings.

Calvary Baptist Church, near Daniel, was dedicated Sunday, three services—morning, afternoon and evening—being held, and an old-fashioned basket dinner was served on the grounds. Rev. E. S. Leaman, the pastor, preached in the morning, and Rev. E. C. Staples of Orange in the afternoon.

Rev. D. J. O'Connell, Bishop of Richmond, made his first official visit to the Catholic church here last Sunday, when he confirmed a class of fifteen children and adults. An attractive musical program formed part of the services and a solo was sung by Mrs. Hamilton Smith.

The ministers and deacons of all the Baptist churches in this and adjoining counties held a joint meeting in the Culpeper Baptist Church Saturday and Sunday. The principal speakers were Rev. Mr. Fraser of Madison and Rev. Mr. Reynolds of Rappahannock. Sunday afternoon they all joined in holding in the morning and evening sessions.

Miss Martha Withers Griffin, daughter of Mrs. Mary Frances Griffin, and John Merry Lewis were married Wednesday at 3 o'clock in the New Salem Baptist Church of this county. Dr. Clyde Lewis of Culpeper was his brother's best man, and the bride's bridesmaid was her younger sister, Miss Geraldine Griffin.

The ceremony was performed by Rev. Stockton Cole, pastor of the church. After a wedding trip Mr. and Mrs. Lewis will return to their home in the county, where the groom is a well known business man.

Mrs. Sarah H. Hoge, the state president of the W. C. T. U., will hold an institute in Culpeper this week, beginning Monday night and continuing through Tuesday and Wednesday. There will be both morning and evening sessions.

At an old mill site on the Rapidan, in Madison, where Gen. Robert Banks conducted a successful mill for many years prior to the civil war, W. O. Crier and John M. Price, Jr., are building an up-to-date flour and grist mill, which will be in operation in a very short time. The mill owned by Gen. Banks was burned by Federal soldiers during the '60s.

NAVY TO FURNISH STORES.

Has Standard Material for Ships of
All Departments.

The Navy Department is developing its plans whereby other departments of the government may obtain from navy yards and naval stations stores, fittings and equipment for the various vessels belonging to the War Department, revenue cutter service, lighthouse establishment, quarantine and customs service.

There is maintained in store at the various navy yards a stock of standardized materials, and it is believed that it will be to the mutual advantage of all departments of the government to obtain that class of articles through the navy.

U. S. to Exhibit Radio Outfit.

The Navy Department intends to make an exhibit of the latest type of radio outfit at the Panama-Pacific exposition to be held in San Diego, Cal., in 1915. Preliminary steps to that end have been taken by the department, the space for such an exhibit having been offered by the exposition authorities.

the prime object of the study of any line of economics is to secure the greatest value of result from the least expenditure, be it time, labor or money, or a combination of the three. In Chicago for the past year a number of women economists have been concentrating their attention upon the housing problem, with the result that they are able now to show pictures of comfortable quarters which working people may secure for the same price as the congested, unhealthy tenements in which most of them now live.

A series of lantern slides has been prepared to illustrate the results of the research which has been made during the year. These slides are exhibited and explained at public meetings held in different parts of the city. As a result many families now are living under more comfortable conditions than they would have thought possible before.

It generally happens that lack of time to make a longer search is responsible for a family locating itself undesirably, so the economic value of this organized search for healthful living quarters has tremendous possibilities for future good and the work has only begun.

The high cost of living is a subject of interest to economists of both sexes in all parts of the country. Studies are continually in progress as to its causes and the possibilities of overcoming them. In Philadelphia the women of the Housekeepers' League decided that it was due chiefly to the cost of food that the family budget was so large.

They overcame this to a degree last winter by undertaking the distribution of food to the poor at the uniform rate of 24 cents a dozen when the dealers were charging from 6 to 21 cents more. The league took the eggs by the cartload and by special dispensation from the mayor obtained 300 stations for their distribution. An economic study followed as to the cost of the production of the eggs, which showed that they could be produced at a price to render them suitable food for the table of the family of average means, and the league will endeavor to secure them at that rate.

Farmers in Pennsylvania, Delaware, New Jersey, Maryland and Virginia have communicated with the league, offering

to supply not only eggs but other farm products directly to them. In this way the economists in this particular line believe that eventually they will be able to reduce the "cost of living" now existing in many food products.

The Women's Progressive Economic League of New York is advocating the establishment of one big, sanitary, every market in a distributor of all kinds of food supplies. Mr. Edwin Black, the president, spent last summer in Europe studying a number of municipal markets there. There he reported both successful and satisfactory, because of the rigid system of inspection which prevails. This insures a perfectly pure food supply at the proper price to the consumer.

The woman of the future must be the economist of the family. Mrs. Martha Van Rensselaer, head of the department of domestic economy of Cornell University, claims that women do fully 90 per cent of the buying for the American family. At present the following figures are believed to represent the apportionment of the average income: Food, 45 per cent; clothing, 25 per cent; rent, 20 per cent, and the balance for incidentals, including fuel, medical attendance, recreation and savings. Whether this division of the income can be improved upon rests with future students in economy. It has been said recently that if the modern factory it was due chiefly to the cost of food that the family budget was so large.

Nothing could call for a broader training than the study of domestic economy. This same extravagance, if not wisely controlled, can be productive of the greatest general loss.

A few years ago the courses of domestic economy in the educational institutions included chiefly sewing and cooking. In modern domestic economy these

receive least attention because they are largely factory industries. It is consumption and relative value which the modern home economist needs to study. She must learn to choose and to use the great resources of the modern industrial world in a manner to give the greatest benefit to the family dependent upon her for their comfort.

The most important thing in domestic or home economics is a money sense in expenditure. For several years the University of Illinois has been giving a series of lectures upon this subject to women students, which the professor, an expert economist, considers of equal scientific value to the courses upon business administration prepared for the men. At the University of Chicago the proper apportionment of the family income is one of the subjects receiving special consideration.

The agitation for minimum wage laws, which now is becoming pronounced in a number of states, has brought about an extraordinary amount of inquiry into the conditions of the working woman. The results of their work tend toward securing shorter hours, improved conditions, better pay and more general comfort for the woman toilers who, until recently, have received less consideration in this country than in any other. It was a woman economist who conducted the investigations made by the federal government into the conditions of the striking laundry workers in New York last year, and who is conducting investigations of the same industry in a number of other cities with good results.

The agitation for minimum wage laws, which now is becoming pronounced in a number of states, has brought about an extraordinary amount of inquiry into the conditions of the working woman. The results of their work tend toward securing shorter hours, improved conditions, better pay and more general comfort for the woman toilers who, until recently, have received less consideration in this country than in any other. It was a woman economist who conducted the investigations made by the federal government into the conditions of the striking laundry workers in New York last year, and who is conducting investigations of the same industry in a number of other cities with good results.

It is the woman economist who frequently helps the manufacturer to determine the point at which it is unprofitable for him to keep his plant in operation. In her recent book, "Fatigue and Efficiency," Josephine Goldsmith plainly proves that excessive hours of labor for either men or women are frequently an extravagance upon the part of the employer, because the workers are not able to do the same quantity or quality of work when they are exhausted as when they are physically fresh, while the running expenses of the factory remain the same. The owner of a bicycle factory employed girls to count the ball bearings with which the wheels were supplied. As an experiment he was induced to make the day half an hour shorter, and found to his surprise at the end of a week that the same amount of work was recorded. He reduced the day to another half hour and found that not only did he receive the same amount of work, but that there was an increase after the first two weeks. The reason was that counting the small pieces involved a nervous strain, which increased as bodily fatigue developed. With the shorter day it was easier to recuperate the bodily fatigue at night. Consequently the girls came in the morning feeling fully rested, and were able to accomplish more work than in the long day for which the night did not give them sufficient rest.

Much of the welfare work which has been developed in the

past few years is due to the woman economist, who has been able to convince the employer that he gains in the efficiency of his employes by making them comfortable and happy. Economic training now is almost absolutely required of any woman who desires a position in any kind of social or welfare work. This increase in the demand for woman economists is being met by a corresponding increase in the different courses of economic study provided for women in institutions of higher learning.

Peace day, May 18, will be observed more generally in public schools this year. In the opinion of Philander P. Claxton, commissioner of education, Mr. Claxton has just issued a Peace day bulletin for 1913, containing, besides a suggested program for the day, a number of short articles on different phases of the international peace movement, information about the various organizations working for peace, and a collection of poems and prose quotations by famous peace lovers of various nations.

A Peace day this year falls on Sunday and public schools will hold their exercises on the nearest school day.

WORK ON SHIP REPORT.

Old Committee to Bring It In at
December Session.

Although the House committee on merchant marine has not yet been organized for this Congress, members of the committee of the last House are working on the final report on the shipping trust investigation, which has occupied the time of the committee for a year.

The report probably will not be presented to the House until the regular session begins next December.

Madero Gave Officer Watch.

A watch which the late President Madero of Mexico wanted to present to Maj. Charles B. Hagadorn, 23d United States Infantry, is the subject of a bill introduced yesterday by Senator McLean. American officers are forbidden to accept gifts from foreign rulers except by express consent of Congress. The State Department is holding the watch in trust.

A movement has been started by the board of trustees to raise \$10,000 to build a nurses' home on the grounds of the Rockingham Memorial Hospital at Har-

Three "Onyx" Days

APRIL 14th, 15th, and 16th

have been set aside by us for the benefit of
Our Best Friends—the American Public
whose deep and abiding Faith in the "Onyx" Brand has been our Strongest Support.

We recognize our obligations, and, as custodians of the "ONYX" Reputation, we stand pledged to maintain the Standard which has won their Confidence and Approval.

SO ON THESE THREE
"Onyx" Hosiery DAYS
TRADE MARK
MONDAY, TUESDAY, WEDNESDAY,
April 14th, April 15th, April 16th
Through our Splendid Allies, the Merchants of America,
we will offer the following EXTRAORDINARY "ONYX" DAY Values
FOR WOMEN:

B 2285—Women's "ONYX" Seamless Silk Lisle, Black, White and Tan; Hosiery-Looped; "Dub-It" Top, High Spliced Heel and "Doublex" Sole. Made on same Machines as our 50c Silks. This is the first time a Microfaced hose has been made with these features. Val. 3 for 1.00
"Onyx" Day Price, 25c. per pair

H 488—Women's "ONYX" Silk Lisle in Black only, Finest Gauge; Seasonable Weight; "Dub-It" Top; High Spliced Heel and "Doublex" Sole. Value 50c.
"Onyx" Day Price, 3 pairs for \$1.00

E 325—Men's "ONYX" Silk Lisle in Black only, Reinforced with "Doublex" Extra Heel and Toe, and Spliced Sole. The most celebrated and best known Half Hose. Value 50c.
"Onyx" Day Price, 3 pairs for \$1.00

1215—Men's "ONYX" Pure Silk; High Spliced Heel and "Doublex" Sole, with Toe Guard and Silk Plaited Cuff—Black, Tan, Navy, Grey, Cadet, Burgundy, Heine, Purple and Smoke. Value 50c.
"Onyx" Day Price, 3 pairs for \$1.00

FOR MEN:
We hope to be able to supply every "ONYX" Dealer with a fair allotment of these "ONYX" DAY OFFERINGS to meet all demands made upon them.

Should your dealer be unable to supply you, leave your name and address, and all orders will be honored within a reasonable time through him.

"ONYX" Hosiery is in Greater Demand than ever, and in our New
Salesroom and Warehouse we have at this moment
7193 CASES OF "ONYX" HOSIERY
899,125 DOZENS
Ready for Shipment.

THE MODERN WOMAN.

XVII—WOMEN IN ECONOMICS.

By Frederic J. Haskin.

The prime object of the study of any line of economics is to secure the greatest value of result from the least expenditure, be it time, labor or money, or a combination of the three. In Chicago for the past year a number of women economists have been concentrating their attention upon the housing problem, with the result that they are able now to show pictures of comfortable quarters which working people may secure for the same price as the congested, unhealthy tenements in which most of them now live.

A series of lantern slides has been prepared to illustrate the results of the research which has been made during the year. These slides are exhibited and explained at public meetings held in different parts of the city. As a result many families now are living under more comfortable conditions than they would have thought possible before.

It generally happens that lack of time to make a longer search is responsible for a family locating itself undesirably, so the economic value of this organized search for healthful living quarters has tremendous possibilities for future good and the work has only begun.

The high cost of living is a subject of interest to economists of both sexes in all parts of the country. Studies are continually in progress as to its causes and the possibilities of overcoming them. In Philadelphia the women of the Housekeepers' League decided that it was due chiefly to the cost of food that the family budget was so large.

They overcame this to a degree last winter by undertaking the distribution of food to the poor at the uniform rate of 24 cents a dozen when the dealers were charging from 6 to 21 cents more. The league took the eggs by the cartload and by special dispensation from the mayor obtained 300 stations for their distribution. An economic study followed as to the cost of the production of the eggs, which showed that they could be produced at a price to render them suitable food for the table of the family of average means, and the league will endeavor to secure them at that rate.

Farmers in Pennsylvania, Delaware, New Jersey, Maryland and Virginia have communicated with the league, offering

to supply not only eggs but other farm products directly to them. In this way the economists in this particular line believe that eventually they will be able to reduce the "cost of living" now existing in many food products.

The Women's Progressive Economic League of New York is advocating the establishment of one big, sanitary, every market in a distributor of all kinds of food supplies. Mr. Edwin Black, the president, spent last summer in Europe studying a number of municipal markets there. There he reported both successful and satisfactory, because of the rigid system of inspection which prevails. This insures a perfectly pure food supply at the proper price to the consumer.

The woman of the future must be the economist of the family. Mrs. Martha Van Rensselaer, head of the department of domestic economy of Cornell University, claims that women do fully 90 per cent of the buying for the American family. At present the following figures are believed to represent the apportionment of the average income: Food, 45 per cent; clothing, 25 per cent; rent, 20 per cent, and the balance for incidentals, including fuel, medical attendance, recreation and savings. Whether this division of the income can be improved upon rests with future students in economy. It has been said recently that if the modern factory it was due chiefly to the cost of food that the family budget was so large.

Nothing could call for a broader training than the study of domestic economy. This same extravagance, if not wisely controlled, can be productive of the greatest general loss.

A few years ago the courses of domestic economy in the educational institutions included chiefly sewing and cooking. In modern domestic economy these

receive least attention because they are largely factory industries. It is consumption and relative value which the modern home economist needs to study. She must learn to choose and to use the great resources of the modern industrial world in a manner to give the greatest benefit to the family dependent upon her for their comfort.

The most important thing in domestic or home economics is a money sense in expenditure. For several years the University of Illinois has been giving a series of lectures upon this subject to women students, which the professor, an expert economist, considers of equal scientific value to the courses upon business administration prepared for the men. At the University of Chicago the proper apportionment of the family income is one of the subjects receiving special consideration.
